System Analysis & Design Project Interview Questions

1. How are you?
2. Where are you now? How is the situation there regarding COVID?
3. We want to ask you some questions regarding our project of System Analysis & Design course. We have identified that students dropping out due to poverty is a big problem in Bangladesh. What's your opinion on that?
4. We know you are sponsoring some students from your village to study. Are you taking help from any intermediate organization or you are helping by yourself?
5. Have you faced any problem while sponsoring by yourself?
6. We are planning to develop a platform that will help people to sponsor children who are in need of financial help. [Description of our system] What do you think about that?
7. What features do you think will help?
8. Do you think people like you will be comfortable with a system like ours?
9. Is there anything else you would like to share with us?
10. Thanks for your time.
